

# Nived Subbarayan

QA Software Engineer | LI.FI

Barcelona, Spain | Full Working Rights in the UK and Spain

✉ [ssnived@gmail.com](mailto:ssnived@gmail.com) 📞 [+447438761405](tel:+447438761405)

[in Nived Subbarayan](#) [🌐 Nived Subbarayan](#)

QA Software Engineer with 7+ years of experience in Web2 and Web3 enterprises and startups, with a focus on high-quality release assurance, CI/CD pipeline deployment, and scalable test automation frameworks. Demonstrated success in remote-first and hybrid environments at international consultancies (Slalom, Accenture) and Web3 companies (LI.FI, Injective Labs, Chainlink Labs). Proficient across the full Quality Engineering stack, including framework development and tools such as Python, TypeScript, Playwright, PyTest, Docker, CI/CD, and infrastructure validation. Experienced building custom QA AI models and applying LLM tooling to catch quality issues earlier in the software development lifecycle. Open to remote-first, hybrid, and relocation-friendly opportunities.

## SKILLS

### Languages

Master

Python TypeScript  
JavaScript C# Java  
SQL

### Automation

Master

Playwright Cypress  
Appium SpecFlow  
Postman PyTest  
Docker GitHub Actions  
CI/CD

### Testing Methodologies

Master

BDD TDD  
Shift-Left Testing  
E2E Testing API Testing  
Regression Testing  
Mobile Testing  
Performance Testing

### AI & Generative LLM

Master

Generative AI  
AI-Assisted Test Automation  
Prompt Engineering  
LLM Evaluation  
GitHub Copilot Cursor AI  
Claude API MCP

### Services

Master

AWS Azure GitHub  
GitLab Bitbucket Jira  
Grafana  
AWS CloudWatch Twilio

### Leadership

Master

Team Leadership  
Technical Mentoring  
Stakeholder Management  
Agile Coaching  
Technical Communication  
Executive Presentations

### Databases

Intermediate

PostgreSQL MySQL  
MongoDB Redis DBT  
DBT Cloud Snowflake  
DBeaver

### Web3

Master

Hardhat Foundry  
Solidity Smart Contracts  
EVM DeFi Ethers.js  
Solana Tron Go  
Rust

## WORK EXPERIENCE (5)

---

### QA Engineer at LI.FI

Sep 2025 - Current

#### 📍 Barcelona, Spain (Remote)

LI.FI is a leading cross-chain bridging aggregator and DeFi infrastructure provider, offering a unified API for swaps, bridging, and any on-chain action. Integrated by major wallets and protocols including Robinhood Wallet, MetaMask, and Phantom.

- Built custom QA AI models to catch quality issues earlier in the software development lifecycle
- Own automated test frameworks for LI.FI's cross-chain bridging and swapping infrastructure, supporting reliable flows across 800+ integrated partners
- Lead end-to-end and integration testing across APIs, smart contract interactions, and multi-chain transaction paths
- Partner with engineering and product teams to define acceptance criteria, strengthen release gates, and improve defect traceability
- Drive QA strategy through CI/CD integration, coverage expansion, and AI-assisted quality workflows using Claude API, Cursor, and MCP

### QA Software Engineer at Injective Labs

Sep 2024 - Sep 2025

#### 📍 London, United Kingdom (Remote)

Injective Labs is the core contributor to the Injective blockchain, a highly-performant layer-1 protocol built for decentralized finance. It enables advanced trading capabilities such as orderbook-based DEXs, perpetual futures, and cross-chain interoperability through smart contract infrastructure.

- Designing, implementing, and maintaining robust automated test frameworks for Injective's core layer-1 blockchain and DeFi protocols
- Conducting end-to-end testing for smart contract functionality, governance modules, cross-chain interactions, and transaction flows
- Writing and executing Python-based test suites to validate protocol behavior across multiple network environments
- Collaborating closely with engineering and product teams to identify bugs, improve developer workflows, and ensure release quality
- Driving improvements in QA strategy, including test coverage metrics, CI/CD pipeline integration, and error traceability

### QA Software Engineer at Chainlink Labs

Jun 2024 - Oct 2024

#### 📍 London, United Kingdom (Remote)

Chainlink Labs is the leading provider of secure and reliable Web3 services that have enabled trillions of dollars in transaction value across DeFi, insurance, gaming, NFTs, and other major industries. Chainlink Web3 services enhance smart contracts by connecting them to real-world data sources and off-chain computation across any blockchain and provide global enterprises with a universal gateway to all blockchains. Chainlink Labs is dedicated to the development and integration of Chainlink as the industry-standard Web3 services platform connecting the world to blockchains.

- Hired as a QA Software Engineer to help ensure reliability of the products being developed, automate tests and assist in building out test tooling in Go
- Engaged in meaningful discussions and built a network within the Web3 community, connecting with key professionals in the industry
- Acquired a solid understanding of Web3 networks and the functionalities and use cases of Oracles

### Quality Engineering Architect at Slalom Build

Aug 2021 - May 2024

#### 📍 Melbourne, Australia

Slalom is a modern consulting firm focused on strategy, technology, and business transformation. Slalom redefines what's possible and create what's next.

- Lead Quality Engineer involved in architecting and implementing 'shift left' modern quality solutions in multiple projects spanning from web applications, mobile applications, database modernisations and infrastructure modernisations
- Proficient in working in cross functional teams and coaching Software, Data, Platform and other Quality Engineers on best quality practices throughout the whole software development lifecycle
- Demonstrated exceptional leadership and architectural skills which led to a role promotion from Senior Quality Engineer to Quality Engineering Architect

**Quality Engineering Consultant** at Accenture

**Mar 2019 - Aug 2021**

📍 **Melbourne, Australia**

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale.

- Working as a systems QA Engineer in client operations and project delivery
- Adept in Agile working methodologies. Received an ICAgile Certified Professional certification
- Proficient in working in teams both domestically and internationally

## PROJECTS (12)

**LI.FI | AI-Driven Cross-Chain QA Infrastructure** at LI.FI

**Sep 2025 - Current**

📍 **Barcelona, Spain (Remote)**

TypeScript Python Playwright API Testing Cross-Chain Smart Contracts CI/CD DeFi Generative AI MCP

Leading quality assurance for LI.FI's cross-chain DeFi platform, combining scalable test automation with custom QA AI models to catch issues earlier in the software development lifecycle across 800+ integrated partners.

- Designed and implemented custom QA AI models to surface quality gaps earlier in the software development lifecycle
- Built automated test suites covering cross-chain swap and bridge flows across multiple EVM and non-EVM networks
- Established API testing coverage for LI.FI's unified routing and aggregation endpoints
- Integrated test automation and AI quality checks into CI/CD pipelines to enforce release gates on every change
- Partnered with protocol engineers to design regression suites for new chain integrations and partner onboarding

**Injective Protocol | Layer-1 DeFi Testing Infrastructure** at Injective Labs

**Sep 2024 - Sep 2025**

📍 **London, United Kingdom (Remote)**

Python Go Playwright PyTest Smart Contracts IBC Governance CI/CD Cosmos SDK

Designed and implemented end-to-end test infrastructure for Injective's layer-1 DeFi protocol, covering orderbook-based DEXs, governance, and cross-chain interactions.

- Built scalable test frameworks to validate smart contract functionality and transaction behavior across Injective's protocol modules
- Owned end-to-end testing for governance flows, staking logic, and cross-chain relaying (IBC)
- Improved QA release confidence by integrating coverage metrics and dynamic validations into CI/CD pipelines

- Used Go for CLI test execution, SDK-based test scripting, and transaction validation utilities

#### **Chainlink Tooling QA | Oracle and Web3 Infrastructure** at Chainlink Labs

**Jun 2024 - Jul 2024**

📍 **London, United Kingdom (Remote)**

Go QA Tooling Oracles Smart Contracts Web3 Automation

Contributed to QA tooling initiatives to improve reliability and coverage for Chainlink's oracle network infrastructure.

- Wrote automation tests and assisted in building reusable tooling in Go for oracle validation
- Collaborated with engineers to expand test coverage and document edge cases for smart contract data feeds
- Gained direct exposure to Chainlink's oracle architecture and decentralized node interactions

#### **Government Client | Census Web Application** at Slalom Build

**Jan 2024 - May 2024**

📍 **Melbourne, Australia**

Selenium Java API Testing Postman React AWS JIRA

Quality Engineer tasked with ensuring the reliability of a critical nationwide census web application used by over 20 million users.

- Lead Quality Engineer for the functional testing team ensuring that features were built to a high standard
- Coached developers to be able to build reliably to handle high peak loads and prevent downtime
- Developed robust test automation frameworks leveraging Selenium, guaranteeing smooth performance of the census form during critical user periods

#### **Financial Services Client | Engagement Application** at Slalom Build

**Jan 2023 - Dec 2023**

📍 **Melbourne, Australia**

Specflow C# .NET API Testing TypeScript JavaScript Postman Playwright Appium React GitLab AWS JIRA

Led the quality modernisation effort for a mobile application and front-end web application using a behaviour-driven framework.

- Led a Quality Engineering team to maintain quality standards and hit all release deadlines
- Built a custom shippable back-end API testing template for use in all the client's back-end repositories
- Coached developers to be able to add their own tests and create a cohesive quality-driven team
- Demoed new features to the wider client team in their company wide showcase calls

#### **Retail Client | Merchant Web Application** at Slalom Build

**Jun 2022 - Dec 2022**

📍 **Melbourne, Australia**

Python Playwright React TypeScript JavaScript GitLab AWS JIRA

Led the quality modernisation effort for a front-end web application by utilising Playwright to overhaul the current test automation framework.

- Established and implemented best practices for the development and pipeline processes to ensure that the highest standards of quality were met throughout this and future projects

- Utilised AWS Cloudwatch to set up monitoring and alerting for performance triggers

#### **Retail Client | Notification Service** at Slalom Build

**Mar 2022 - Jun 2022**

📍 **Melbourne, Australia**

Python Gmail API PyTest Twilio AWS JIRA

Directed the quality strategy and implementation for a notification service modernisation project, overseeing the overhaul of the way emails and text messages are sent at large scale business entities.

- Developed custom python scripts to programatically access a test gmail and twilio inboxes to validate the successful sending of email and text messages
- Integrated the custom tests with the CI/CD pipelines to optimise test automation in the software development lifecycle

#### **Retail Client | Data Platform** at Slalom Build

**Jan 2022 - Mar 2022**

📍 **Melbourne, Australia**

DBT DBT Cloud SQL Snowflake AWS DBeaver GitLab JIRA

Coordinated the architecture, design, and implementation of a data quality strategy for a modernised analytics platform and services on AWS Cloud in a cross-functional team. This enabled the agency to offer reliable analytics as a shared service to customers through the use of native and 3rd party components.

- Solidified my understanding of best quality practices in data-driven projects
- Implemented modern data quality checks in the CI/CD pipelines

#### **Oil & Gas Client | Site Owner Web Application** at Slalom Build

**Aug 2021 - Dec 2021**

📍 **Melbourne, Australia**

Cypress TypeScript JavaScript Azure AWS JIRA

Led the development and implementation of a quality strategy for a consolidated front-end web application for physical site owners, managing testing, defect identification, and cross-functional collaboration for successful delivery.

#### **myWizardAiOps | Automated Ticketing Platform** at Accenture

**Aug 2019 - Aug 2021**

📍 **Melbourne, Australia**

Cypress TypeScript JavaScript AWS JIRA

Led a Quality Engineering team tasked with the creation and implementation of best Quality Engineering practices for an internal Automated Ticket resolution SaaS product which Accenture sells to clients.

#### **Government Client | Systems Tester** at Accenture

**Mar 2019 - Aug 2019**

📍 **Melbourne, Australia**

Manual Testing Test Plans Documentation Test Cases Agile JIRA

Systems tester involved in managing release processes and working in an agile environment. Tasked with manual testing and creating test plans and test documentation to ensure government standards and release deadlines are met.

**Summit Participant** at Engineers Without Borders Australia

**Jun 2018 - Jul 2018**

📍 **Kuching, Malaysia**

Volunteering

Thesis

Human-Centred Design

Undertook a humanitarian engineering trip to Borneo to further my human-centred design skills and cultural awareness.

- Conducted as part of my honours thesis titled “Optimisation of off-grid solar photovoltaic systems in developing areas”

**EDUCATION (2)**

**Bachelor of Engineering (Honours) Mechatronic Systems** at The Australian National University

**2015 - 2018**

**GPA:** 6.3/7.0

**Study Abroad Engineering Exchange Program** at The University of Wisconsin-Madison

**2017 - 2017**

**AWARDS**

**Certified Solutions Architect – Associate** at AWS

**Certified Cloud Practitioner** at AWS

**Certified Professional Certification** at ICAgile

**2 x Slalom Build Team Mogul** at Slalom Build

Awarded to members of the best performing Slalom Build team over the quarter

**New Colombo Plan Scholarship** at The Australian National University

Due to my high academic standing, I have received a New Colombo Plan Scholarship valued at \$3,000 from the Australian National University

**Honours Thesis** at The Australian National University

Completed an honours thesis titled “Optimisation of off-grid solar photovoltaic systems in developing areas”
